## 1. Identification of the substance/mixture and of the company/undertaking

**Product name** Express Prep Wipes U3000

**Product code** 02080189

**Recommended use of the chemical**

Cleaning agent for professional use

**Restrictions on use**

The product is only for industrial and/or professional use, not for any private consumer use.

**Information on the Manufacturer/Supplier/Distributor**

Producer/Supplier

Axalta Coating Systems Australia Pty Limited

Street/Box

15 - 23 Melbourne Road, Riverstone NSW 2765, Australia

**Product Information**

Telephone

+61 (0)2 8818 4300

<http://www.standex.com.au>

**Emergency Information**

Emergency telephone number

1800 089 766

AU Poisons Information Centre: 131 126

Medical Emergency Phone

1800 674 415

Transportation Emergency Phone

1800 089 766

## 2. Hazards identification

Not classified as hazardous according to the GHS criteria under Australian Work Health Safety (WHS) Act 2011.

Not classified as dangerous goods according to the Australian Dangerous Goods (ADG) Code.

**GHS-Classification**

Not classified according to GHS criteria

**GHS-Labeling**

Hazard symbols

Not classified according to GHS criteria

Signal word: Not classified according to GHS criteria

Hazard statements

Not classified according to GHS criteria

Precautionary statements

Not classified according to GHS criteria

**Other hazards which do not result in classification**

Safety data sheet available for professional user on request.

**Special hazard instructions for humans and environment**

Do not breathe dust.

Restricted to professional users.

## 3. Composition/information on ingredients

**Chemical nature**

Mixture of synthetic resins and solvents

**Hazardous components**

Not classified according to GHS criteria

## 4. First aid measures

### Eye contact

Remove contact lenses. Irrigate copiously with clean, fresh water for at least 15 minutes, holding the eyelids apart. Seek medical advice.

### Skin contact

Do NOT use solvents or thinners. Take off all contaminated clothing immediately. Wash skin thoroughly with soap and water or use recognized skin cleanser. If skin irritation persists, call a physician.

### Inhalation

Avoid breathing dust. Inhalation of dust may cause shortness of breath, tightness of the chest, a sore throat and cough. Move to fresh air. If breathing is irregular or stopped, administer artificial respiration. If symptoms persist, call a physician.

### Ingestion

If swallowed, seek medical advice immediately and show this safety data sheet (SDS) or product label.

### Most Important Symptoms/effects, acute and delayed

#### Inhalation

Dust generated from this product may be irritating to the respiratory tract.

#### Ingestion

May result in gastrointestinal distress.

#### Skin or eye contact

Dust generated from this product may cause irritation of the eyes. Repeated or prolonged contact may cause skin irritation with discomfort and dermatitis.

### Indication of Immediate medical attention and special treatment needed if necessary

No data available on the product. See section 3 and 11 for hazardous ingredients found in the product.

## 5. Firefighting measures

### Suitable extinguishing media

Water spray/Dry chemical

### Extinguishing media which shall not be used for safety reasons

High volume water jet

### Hazardous combustion products

CO, CO<sub>2</sub>, smoke, and oxides of any heavy metals that are reported in "Composition, Information on Ingredients" section.

### Fire and Explosion Hazards

The product is not flammable.

### Special Protective Equipment and Fire Fighting Procedures

Full protective flameproof clothing should be worn as appropriate. Wear self-contained breathing apparatus for firefighting if necessary. In the event of fire, cool tanks with water spray. Do not allow run-off from fire fighting to enter public sewer systems or public waterways.

### Additional information

Hazchem Code:

## 6. Accidental release measures

### Personal precautions, protective equipment and emergency procedures

Keep away from sources of ignition. Air out the room. Do not breathe dust. Comply with safety directives (see chapters 7 and 8).

Product name: Express Prep Wipes U3000

Product code: 02080189

Print Date: 2017-04-26

v2.1

Last Revision Date: 2017-03-17

AU/en Page 3- 7

**Environmental precautions**

Do not let product enter drains. Notify the respective authorities in accordance with local law in the case of contamination of rivers, lakes or waste water systems.

**Methods for cleaning up**

Contain and collect spillage with a electrically protected vacuum cleaner or by wet brushing and place in container for disposal according to local regulations. Do not use a dry brush as dust clouds or static can be created! Use a suitable vacuum cleaner.

## 7. Handling and storage

**Handling**

It is recommended that advice is taken from a competent occupational health practitioner on the assessment of employees with skin or respiratory complaints before the individual is exposed to the uncured product.

**Safe handling advice**

Precautions should be taken to prevent the formation of dusts in concentrations above flammable, explosive or occupational exposure limits. Preparation may charge electrostatically: always use grounded leads when transferring from one container to another.

Operators should wear antistatic footwear and clothing. Keep away from open flames, hot surfaces and sources of ignition.

Smoking, eating and drinking should be prohibited in the application area.

Electrical equipment and lighting should be protected to appropriate standards to prevent dust coming into contact with hot surfaces, sparks or other ignition sources. For personal protection see section 8. Comply with the health and safety at work laws. If material is a coating, do not sand, flame cut, braze or weld dry coating without an appropriate respirator or appropriate ventilation, and gloves.

**Advice on protection against fire and explosion**

Never use pressure to empty container: container is not a pressure vessel. Always keep in containers of same material as the original one.

**Storage****Requirements for storage areas and containers**

Storage temperature: +5 to +35°C. Observe label precautions. Store in a dry, well ventilated place away from sources of heat, ignition and direct sunlight. No smoking. Prevent unauthorized access. Containers which are opened must be carefully resealed and kept upright to prevent leakage.

**Advice on common storage**

Store separately from oxidizing agents and strongly alkaline and strongly acidic materials.

## 8. Exposure controls/personal protection

**Additional technical information on the plant**

Do not breathe dust. Provide adequate ventilation. This should be achieved by a good general extraction and -if practically feasible- by the use of a local exhaust ventilation. If these are not sufficient to maintain exposure to dusts below the OEL, suitable respiratory protection must be worn. During spray operations, use spray booth fitted to airflow requirements of AS/NZS 4114.

**Protective equipment**

Personal protective equipment should be worn to prevent contact with eyes, skin or clothing.

**Respiratory protection**

If dust formation exceeds the air concentration limits, then a respiratory protection device approved for this purpose must be worn.

**Hand protection**

The breakthrough time of gloves is unknown for the product itself. The glove material given is recommended on basis of the substances in the preparation.

Chemical name	Glove material	Glove thickness	Break through time
	Nitrile rubber	0.33 mm	> 240 min

Product name: Express Prep Wipes U3000

Product code: 02080189

Print Date: 2017-04-26

v2.1

Last Revision Date: 2017-03-17

AU/en Page 4- 7

The protective glove should be checked in each case for their work specific suitability (e.g. mechanical stability, product compatibility, and anti-static properties). When the intended use is for spray application a nitrile glove of the chemical resistance group 3 (e.g. Dermatril® glove) is to be used. After contamination, the glove has to be changed. If immersing the hands into the product is not avoidable (e.g. maintenance work) a butyl or fluorocarbon rubber glove should be used. When skin exposure may occur to materials specified in section 3 of this SDS, advice should be sought from the glove supplier as to appropriate type to use with this product and the permeation breakthrough times. Care should be taken when working with sharp edged articles as these can easily damage the gloves and make them ineffective. The instructions and information provided by the glove supplier on use, storage, maintenance and replacement must be followed. Damaged gloves or those showing signs of wear should be replaced immediately.

#### Eye protection

Eye protection (to EN 166/170) designed to protect against exposure to dusts should be worn when there is a likelihood of exposure.

#### Skin and body protection

Wear suitable protective clothing. Care should be taken in the selection of protective clothing. Avoid contact with the powder on throat and wrists due to possible inflammation and irritation of the skin.

#### Hygiene measures

Wash skin thoroughly with soap and water or use recognized skin cleanser. Do not use organic solvents!

#### Environmental exposure controls

Do not let product enter drains.

For ecological information refer to section 12.

## 9. Physical and chemical properties

### Information on basic physical and chemical properties

#### Appearance

**Form:** solid; **Colour:** orange; **Odour:** Odour is not perceptible.; **Odor Threshold :** No data available

#### Important health, safety and environmental information

Property	Value	Method
pH	Not applicable	
Melting point/freezing point	Not applicable.	
Boiling point/boiling range		
Flash point	Not applicable.	EN ISO 3679
Evaporation rate	Not applicable	
Flammability (solid, gas)	No data available	
Lower explosion limit	No data available	
Upper explosion limit	No data available	
Vapour pressure	Not applicable.	
Vapour density	No data available	
Density	1.5 g/cm <sup>3</sup>	20 °C - DIN 53217/ISO 2811
Solubility(ies)		
Water solubility	completely miscible	
Solubility in other solvents	No data available	
Partition coefficient: n-octanol/water	This product is a mixture. For ingredient details see section 12	
Decomposition temperature	This product is a mixture. For further information see section 10.	
Viscosity (23 °C)	solid	
Explosive properties	Not explosive	
Oxidizing properties	not oxidizing	

#### Other data

Content of volatile components (including water)	0.9 %	Basis Vapour pressure >= 0.01 kPa
--	-------	-----------------------------------

## 10. Stability and reactivity

### Stability

Stable

### Conditions to avoid

Stable under recommended storage and handling conditions (see section 7).

### Materials to avoid

Keep away from oxidizing agents, strongly alkaline and strongly acid materials in order to avoid exothermic reactions.

### Hazardous decomposition products

When exposed to high temperatures may produce hazardous decomposition products such as carbon monoxide and dioxide, smoke, oxides of nitrogen.

### Hazardous Polymerization

Will not occur.

### Sensitivity to Static Discharge

No data available

### Sensitivity to Mechanical Impact

None known.

## 11. Toxicological information

### Information on likely routes of exposure

#### Inhalation

Dust generated from this product may be irritating to the respiratory tract.

#### Ingestion

May result in gastrointestinal distress.

#### Skin or eye contact

Dust generated from this product may cause irritation of the eyes. Repeated or prolonged contact may cause skin irritation with discomfort and dermatitis.

### Delayed and immediate effects and also chronic effects from short and long term exposure:

#### Acute oral toxicity

not hazardous

#### Acute dermal toxicity

not hazardous

#### Acute inhalation toxicity

not hazardous

% of unknown composition: 0 %

#### Skin corrosion/irritation

Not classified according to GHS criteria

#### Serious eye damage/eye irritation

Not classified according to GHS criteria

## Respiratory sensitisation

Not classified according to GHS criteria

## Skin sensitisation

Not classified according to GHS criteria

## Germ cell mutagenicity

Not classified according to GHS criteria

## Carcinogenicity

Not classified according to GHS criteria

## Toxicity for reproduction

Not classified according to GHS criteria

## Target Organ Systemic Toxicant - Single exposure

Not classified according to GHS criteria

## Target Organ Systemic Toxicant - Repeated exposure

Not classified according to GHS criteria

## Aspiration toxicity

Not classified according to GHS criteria

## Numerical measures of toxicity (acute toxicity estimation (ATE),etc. )

No information available.

## Symptoms related to the physical, chemical and toxicological characteristics

No information available.

## 12. Ecological information

### Ecotoxicity effects

There are no data available on the product itself. The product should not be allowed to enter drains or watercourses. The data in this section is consistent with data from chemical safety reports available at the date of revision.

### Persistence and degradability

No information available.

### Bioaccumulation

No information available.

### Mobility in soil

No information available.

### Other adverse effects

No information available.

## 13. Disposal considerations

Incinerate or otherwise dispose of waste material in accordance with local regulations. The product should not be allowed to enter drains, water courses or the soil. Do not incinerate in closed containers.

### Contaminated packaging

Empty containers should be taken to an approved waste handling site for recycling or disposal. If recycling is not practicable, dispose of in compliance with local regulations.

## 14. Transport information

Not classified as dangerous in the meaning of transport regulations.

### Matters needing attention for transportation

Confirm that there is no breakage, corrosion, or leakage from the container before shipping. Be sure to prevent damage to cargo by loading so as to avoid falling, dropping, or collapse. Ship in appropriate containers with denotation of the content in accordance with the relevant statutes and rules.

## 15. Regulatory information

### S-phrases(s)

S22 | Do not breathe dust.

Safety data sheet available for professional user on request.

### National regulatory information

- TODO: NICNAS conditions of use
- Standard for the Uniform Scheduling of Medicines and Poisons
  - No poison schedule number allocated.
- Information about Other Regulations.
  - Not applicable

Restricted to professional users.

## 16. Other information

Sources of key data used to compile the datasheet

1. Code of Practice for the Preparation of Safety Data Sheets for Hazardous Chemicals, December 2011
2. Guidance on the Classification of Hazardous Chemicals Under The WHS Regulations, April 2012
3. Adopted National Exposure Standards for Atmospheric Contaminants in the Occupational Environment
4. Australian Dangerous Goods Code, 7.3 (National Road Transport Commission)
5. Standard for the Uniform Schedule of Medicines and Poisons (SUSMP), No. 9
6. Labelling of Workplace Hazardous Chemicals Code of Practice, March 2015

### Further information

The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text. This Safety Data Sheet is valid in Australia for up to 5 years from listed Revision Date or when superseded by a later version.
