

Page 1/12 Printing date: 11.01.2023 Revision date: 11.01.2023 Version no. 3

Hazardous according to criteria of Australian Safety and Compensation Council.

1 Identification

· Product identifier

Trade name: BODY PRO P962 1K ISOLATOR

• Article number: 433

[•] Relevant identified uses of the substance or mixture and uses advised against • Sector of Use

SU3 Industrial uses: Uses of substances as such or in preparations at industrial sites

SU22 Professional uses: Public domain (administration, education, entertainment, services, craftsmen)

- Product category PC9b Fillers, putties, plasters, modelling clay
- Process category PROC8a Transfer of substance or mixture (charging and discharging) at non-dedicated facilities
- Environmental release category ERC2 Formulation into mixture

• Article category AC1 Vehicles

· Application of the substance / the mixture Surface protection

• Details of the supplier of the safety data sheet

Manufacturer/Supplier:

HB BODY S.A. B' ENTRANCE BLOCK 50 DA9 & MB6 Str THESSALONIKI INDUSTRIAL AREA 57.022, SINDOS THESSALONIKI,GREECE Ph: +30 2310 790 000 Fax: +30 2310 790 033 www.hbbody.com email: hbbody@hbbody.com

Further information obtainable from:

Sydney Automotive Paints & Equipment PTY LTD Unit A3, 366 Edgar St. Condell Park NSW 2200 AUSTRALIA, Tel. +02 9772 9000, +02 9772 9001

Emergency telephone number:

If poisoning occurs contact a doctor or Poisons Information Centre. Phone Australia 131 126, New Zealand 0800 764 766.

2 Hazard(s) Identification

Classification of the substance or mixture

H225 Highly flammable liquid and vapour.

Page 2/12 Printing date: 11.01.2023 Revision date: 11.01.2023 Version no. 3

Trade name: BODY PRO P962 1K ISOLATOR

H351 Suspected of causing cancer. Route of exposure: Inhalation.

Serious eye damage/irritation – Category 2A H319 Causes serious eye irritation. STOT SE 3 H336 May cause drowsiness or dizziness.

· Label elements

• **GHS label elements** The product is classified and labelled according to the Globally Harmonised System (GHS). • **Hazard pictograms**

· Signal word Danger

• **Hazard-determining components of labelling:** titanium dioxide

Hazard statements

H225 Highly flammable liquid and vapour.

H319 Causes serious eye irritation.

H351 Suspected of causing cancer. Route of exposure: Inhalation.

H336 May cause drowsiness or dizziness.

Precautionary statements

P210 Keep away from heat/sparks/open flames/hot surfaces. No smoking.

P241 Use explosion-proof electrical/ventilating/lighting equipment.

P303+P361+P353 IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower.

P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P405 Store locked up.

P501 Dispose of contents/container in accordance with local/regional/national/international regulations.

• Other hazards

Results of PBT and vPvB assessment

• **PBT:** Not applicable.

· **vPvB:** Not applicable.

3 Composition and Information on Ingredients

[•] Chemical characterisation: Mixtures

• **Description:** Mixture of hazardous substances listed below with nonhazardous additions.

Dangerous components:

CAS: 67-63-0 propan-2-ol EINECS: 200-661-7 Flam. Liq. 2, H225 Index number: 603-117-00-0 Serious eye damage/irritation – Category 2A, H319; STOT SE 3, H336 RTECS: NT 8050000 45-<50%

Continue on page 3 AU

CAS: 471-34-1 EINECS: 207-439-9	calcium carbonate	20-<25%
RTECS: EV 9580000 CAS: 13463-67-7 EINECS: 236-675-5 Index number: 022-006-00-2	titanium dioxide I Carc. 2, H351	10-<15%
CAS: 78-83-1 EINECS: 201-148-0 Index number: 603-108-00-1 RTECS: NP 9625000	butanol Flam. Liq. 3, H226 Eye Dam. 1, H318 Skin Irrit. 2, H315; STOT SE 3, H335-H336	≥1-<3%
CAS: 100-64-1 EINECS: 202-874-0 RTECS: GW 1925000	cyclohexanone oxime Acute Tox. 3, H301	0-<0.9%

• Additional information: For the wording of the listed hazard phrases refer to section 16.

4 First Aid Measures

General information:

Immediately remove any clothing soiled by the product.

Symptoms of poisoning may even occur after several hours; therefore medical observation for at least 48 hours after the accident.

- After inhalation: Supply fresh air; consult doctor in case of complaints.
- After skin contact: Immediately rinse with water.

After eye contact:

Rinse opened eye for several minutes under running water. If symptoms persist, consult a doctor. Remove contanct lenses in case of eye contamination and irrigae copiously with clean water for at least 15 minutes trying to hold the eye lids open.

• <u>After swallowing:</u> If symptoms persist consult doctor.

· Information for doctor:

• Most important symptoms and effects, both acute and delayed No further relevant information available.

Indication of any immediate medical attention and special treatment needed

No further relevant information available.

5 Fire Fighting Measures

Suitable extinguishing agents: CO2, powder or water spray. Fight larger fires with water spray or alcohol resistant foam.

• Special hazards arising from the substance or mixture No further relevant information available.

Advice for firefighters

Firefighters should always protective equipment and breathing apparatus when handling fire coming from these products

• Speial protective equipment and fire fighting procedures: No special measures required.

Additional information Collect contaminated fire fighting water separately. It must not enter the sewage system.

6 Accidental Release Measures

Personal precautions, protective equipment and emergency procedures

Wear protective equipment. Keep unprotected persons away.

Environmental precautions:

Dilute with plenty of water.

Do not allow to enter sewers/ surface or ground water.

Methods and material for containment and cleaning up:

Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust). Dispose contaminated material as waste according to item 13.

Ensure adequate ventilation.

Page 4/12 Printing date: 11.01.2023 Revision date: 11.01.2023 Version no. 3

Trade name: BODY PRO P962 1K ISOLATOR

Reference to other sections

See Section 7 for information on safe handling. See Section 8 for information on personal protection equipment. See Section 13 for disposal information.

7 Handling and Storage

· Handling:

[•] Precautions for safe handling

Ensure good ventilation/exhaustion at the workplace. Open and handle receptacle with care. Prevent formation of aerosols.

Information about fire - and explosion protection:

Keep ignition sources away - Do not smoke. Protect against electrostatic charges.

Keep respiratory protective device available.

Storage:

Requirements to be met by storerooms and receptacles: Store in a cool location.

[•] Information about storage in one common storage facility: Not required.

Further information about storage conditions:

Keep container tightly sealed.

Store in cool, dry conditions in well sealed receptacles.

Specific end use(s) No further relevant information available.

8 Exposure controls and personal protection

• Additional information about design of technical facilities: No further data; see item 7.

Ingredients with limit values that require monitoring at the workplace:

67-63-0 propan-2-ol

WES Short-term value: 1230 mg/m³, 500 ppm Long-term value: 983 mg/m³, 400 ppm

471-34-1 calcium carbonate

WES Long-term value: 10 mg/m³ inhalable dust

78-83-1 butanol

WES Long-term value: 152 mg/m³, 50 ppm

• Additional information: The lists valid during the making were used as basis.

Personal protective equipment:

General protective and hygienic measures:

Keep away from foodstuffs, beverages and feed. Immediately remove all soiled and contaminated clothing Wash hands before breaks and at the end of work. Store protective clothing separately. Avoid contact with the eyes. Avoid contact with the eyes and skin.

Respiratory protection:

In case of brief exposure or low pollution use respiratory filter device. In case of intensive or longer exposure use self-contained respiratory protective device.

Continue on page 5 AU

Protection of hands:

Protective gloves

The glove material has to be impermeable and resistant to the product/ the substance/ the preparation. Due to missing tests no recommendation to the glove material can be given for the product/ the preparation/ the chemical mixture. Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation

Material of gloves

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

Penetration time of glove material

The exact break trough time has to be found out by the manufacturer of the protective gloves and has to be observed.

• For the permanent contact gloves made of the following materials are suitable: Fluorocarbon rubber (Viton)

For the permanent contact of a maximum of 15 minutes gloves made of the following materials are suitable: Rubber gloves

Eye protection:

Tightly sealed goggles

Body protection: Protective work clothing

9 Physical and Chemical Properties

, i hjoheat and ohermeat i repertied			
General Information			
Appearance:			
· Form:	Liquid		
· Colour:	Dark yellow		
· Odour:	Characteristic		
Odour threshold:	Not determined.		
pH-value at 20 °C:	5-8		
Change in condition			
Melting point/freezing point:	Undetermined.		
· Initial boiling point and boiling range: 82 °C			
Flash point:	< 23 °C		
Flammability (solid, gas):	Highly flammable.		
Autoignition temperature:	425 °C		
Decomposition temperature:	Not determined.		
Auto-ignition temperature:	Product is not selfigniting.		
• Explosive properties:	Risk of explosion by shock, friction, fire or other sources of ignition.		
Explosion limits:			
· Lower:	2 Vol %		
· Upper:	12 Vol %		
• Vapour pressure at 20 °C:	43 hPa		
Density at 20 °C:	1.034 g/cm ³		

Continue on page 6 AU

Relative density	Not determined.
·Vapour density	Not determined.
• Evaporation rate	Not determined.
Solubility in / Miscibility with	
water:	Fully miscible.
Partition coefficient: n-octanol/water:	Not determined.
Viscosity:	
· Dynamic:	Not determined.
· Kinematic:	Not determined.
Solvent content:	
[•] Organic solvents:	50.5 %
· Water:	0.0 %
VOC (EC)	528.7 g/l
Solids content (volume):	48.2 %
Other information	No further relevant information available.

10 Stability and Reactivity

Reactivity No further relevant information available.

• Thermal decomposition / conditions to be avoided: No decomposition if used according to specifications.

Possibility of hazardous reactions No dangerous reactions known.

Conditions to avoid No further relevant information available.

· Incompatible materials: No further relevant information available.

· Hazardous decomposition products: No dangerous decomposition products known.

11 Toxicological Information

· Information on toxicological effects

• Acute toxicity Based on available data, the classification criteria are not met.

LD/LC50 values relevant for classification:

ATE (Acute Toxicity Estimates)

Oral LD50 45,652 mg/kg

67-63-0 propan-2-ol

LD50 Oral 5,045 mg/kg (rat) Dermal LD50 12,800 mg/kg (rabbit)

Inhalative LC50/4 h 30 mg/l (rat)

471-34-1 calcium carbonate

Oral LD50 6,450 mg/kg (rat)

9000-59-3 Shellac

Oral LD50 >5,000 mg/kg (rat) Dermal LD50

>10,000 mg/kg (rab)

13463-67-7 titanium dioxide

Oral LD50 >20,000 mg/kg (rat) Dermal LD50 >10,000 mg/kg (rabbit) Inhalative LC50/4 h >6.82 mg/l (rat)

> Continue on page 7 AU

Page 7/12 Printing date: 11.01.2023 Revision date: 11.01.2023 Version no. 3

Trade name: BODY PRO P962 1K ISOLATOR

78-83-1 butanol

Oral LD50 2,460 mg/kg (rat) Dermal LD50 3,400 mg/kg (rabbit)

100-64-1 cyclohexanone oxime

Oral LD50 100 mg/kg (ATE)

• Skin corrosion/irritation Based on available data, the classification criteria are not met.

• Serious eye damage/irritation Causes serious eye irritation.

• **Respiratory or skin sensitisation** Based on available data, the classification criteria are not met.

• Germ cell mutagenicity Based on available data, the classification criteria are not met.

Carcinogenicity Suspected of causing cancer. Route of exposure: Inhalation.

• **Reproductive toxicity** Based on available data, the classification criteria are not met.

• STOT-single exposure May cause drowsiness or dizziness.

• **STOT-repeated exposure** Based on available data, the classification criteria are not met.

• Aspiration hazard Based on available data, the classification criteria are not met.

12 Ecological Information

· Toxicity

Aquatic toxicity:

This product is not toxic for the aquatic life. Nevertheless do not dispose the product or any cleaning solvents used along with this product into the sea

• Persistence and degradability

This prouduct contains polyesteric molecules and organic solvents and is not known to be bioaccumulative. It can be considered as biodegradable in small quantities. In case of disposal, it should be treated as a hazardous material and should be disposed accordingly. Do not just throw it away

Behaviour in environmental systems:

Bioaccumulative potential No further relevant information available.

• Mobility in soil No further relevant information available.

Additional ecological information:

General notes:

Water hazard class 1 (German Regulation) (Self-assessment): slightly hazardous for water

Do not allow undiluted product or large quantities of it to reach ground water, water course or sewage system.

Results of PBT and vPvB assessment

• **PBT:** This product contains no substance that is considered to be persistent, bioaccumulating or non toxic(PBT).

• **vPvB**: This mixture contains no substance that is considered to be very persistent or very bioaccumulating (vPvB).

· Other adverse effects No further relevant information available.

13 Disposal considerations

· Waste treatment methods

• **Recommendation** Must not be disposed together with household garbage. Do not allow product to reach sewage system.

Uncleaned packaging:

• **Recommendation:** Disposal must be made according to official regulations.

• **Recommended cleansing agents:** Water, if necessary together with cleansing agents.

Annex: Exposure scenario

Short title of the exposure scenario

Sector of Use

SU3 Industrial uses: Uses of substances as such or in preparations at industrial sites

SU22 Professional uses: Public domain (administration, education, entertainment, services, craftsmen)

• **Product category** PC9b Fillers, putties, plasters, modelling clay

• Process category PROC8a Transfer of substance or mixture (charging and discharging) at non-dedicated facilities

· Article category AC1 Vehicles

• Environmental release category ERC2 Formulation into mixture

Description of the activities / processes covered in the Exposure Scenario

See section 1 of the annex to the Safety Data Sheet.

Conditions of use According to directions for use.

Duration and frequency

5 workdays/week. Frequency of use:

Physical parameters

The data on the physical - chemical properties in the Exposure Scenario is based on the properties of the preparation.

- Physical state Fluid
- Concentration of the substance in the mixture The substance is main component.
- · Used amount per time or activity Smaller than 100 g per application.
- Other operational conditions

Other operational conditions affecting environmental exposure

No special measures required. Use only on hard ground.

Other operational conditions affecting worker exposure

Avoid contact with eyes.

Take precautionary measures against static discharge.

Keep away from sources of ignition - No smoking.

Other operational conditions affecting consumer exposure No special measures required.

Other operational conditions affecting consumer exposure during the use of the product Not applicable.

Risk management measures

Worker protection

Organisational protective measures

No special measures required.

Ensure good ventilation. This can be achieved by using a local exhaustion or general exhaust system. If these measures are insufficient to keep the solvent vapour concentration below the workplace limit, wear an adequate respiratory protective device.

Technical protective measures

Provide explosion-proof electrical equipment. Ensure that suitable extractors are available on processing machines Use product only in enclosed systems.

Personal protective measures

Do not inhale gases / fumes / aerosols. Avoid contact with the eyes. Tightly sealed goggles

Measures for consumer protection

Ensure adequate labelling. Observe consumer information and advice on safe use.

Continue on page 12 AU

Environmental protection measures

Water

No special measures required.

Do not allow to reach sewage system. Dispose of this product and its container at hazardous or special waste collection point. Do not allow to reach sewage system.

Soil

The product is only processed over the concrete collecting basin.

Prevent contamination of soil.

Disposal measures

Disposal must be made according to official regulations. Ensure that waste is collected and contained.

• **Disposal procedures** Must not be disposed together with household garbage. Do not allow product to reach sewage system.

· Waste type Partially emptied and uncleaned packaging

• Exposure estimation

Consumer

Not relevant for this Exposure Scenario.

This product is to be used by professional technitians only.

Guidance for downstream users

No further relevant information available.

Whether the downstream user acts within the scope of the Exposure Scenario can be verified based on the information in sections 1 to 8.
