

SAFETY DATA SHEET
Juice Endurance Sealant

According to *Preparation of Safety Data Sheets for Hazardous Chemicals Code of Practice, 2011/2018*

SECTION 1: Identification: Product Identifier and Chemical Identity

Product Identifier

Product name Juice Endurance Sealant
Product no. JPEND1L, JPEND500

Relevant identified uses of the substance or mixture and uses advised against

Application Automotive care, polish.
Uses advised against For professional use only. This product is not recommended for any other industrial, professional or consumer use other than specified above.

Details of the supplier of the Safety Data Sheet

Supplier Sydney Automotive Paint and Equipment Pty Ltd
Unit A3, 366 Edgar Street
Condell Park
NSW 2200
Australia
Tel: +61 2 9772 9000
[Email: reception@sape.com.au](mailto:reception@sape.com.au)
www.juicepolishes.com.au
www.sape.com.au

NZ Distributor Resene Automotive & Light Industrial
4 Te Apunga Place
Sylvia Park
Auckland
NZ 1641
Tel: +64 9 259 2738
www.resene.co.nz

Emergency Information

Emergency telephone NZ Poison Information Centre 0800 764 766 or +64 3 479 7248
General medical information +61 2 9772 9000 (Mon to Fri, 08:00-16:00 AEST)
Transport information +61 2 9772 9000 (Mon to Fri, 08:00-16:00 AEST)

Juice Endurance Sealant

SECTION 2: Hazard(s) Identification

Classification of the substance or mixture

Physical and health hazards Classified as hazardous according to the GHS criteria under the Australian Work Health Safety (WHS) Act 2011.

Not classified as a dangerous good according to the Australian Dangerous Goods (ADG) Code, 7.3.

GHS Classification Aspiration hazard Category 1 (Asp. Tox.1)

Environmental hazards Not classified

Label elements

GHS hazard symbols

GHS signal word Danger

Hazard statements H304 - May be fatal if swallowed or enters airways.
 AUH066 - Repeated exposure may cause skin dryness or cracking.

Precautionary statements P301+P310 - IF SWALLOWED: Immediately call a POISON CENTER or doctor /physician.
 P331 - Do NOT induce vomiting.
 P305+P351+P338 - IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
 P314 - Get medical advice/ attention if you feel unwell.
 P280 - Wear protective gloves/protective clothing/eye protection/face protection.

Other hazard information

This product does not contain any substances classified as PBT or vPvB.

SECTION 3: Composition and Information on Ingredients

The product is a mixture.

Distillates (petroleum), hydrotreated light; Kerosine - unspecified CAS number 64742-47-8	GHS Hazardous: Y Asp. Tox. 1	5-10%
--	-------------------------------------	-------

Juice Endurance Sealant

SECTION 4: First Aid Measures

Description of first aid measures

General information	Get medical attention if any discomfort continues. Show this Safety Data Sheet to any medical personnel.
Inhalation	Mildly irritating to respiratory system. In cases of severe exposure, dizziness, confusion, headache or stupor may develop. Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. Maintain an open airway. Loosen tight clothing such as collar, tie or belt.
Ingestion	Rinse mouth thoroughly with water. Remove any dentures. Give a few small glasses of water or milk to drink. Stop if the affected person feels sick as vomiting may be dangerous. Do not induce vomiting unless under the direction of medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Never give anything by mouth to an unconscious person. Maintain an open airway. Loosen tight clothing such as collar, tie or belt.
Skin Contact	Can cause damage to the eyes, skin and mucous membranes. Remove affected person from source of contamination. Rinse immediately with plenty of water.
Eye contact	Rinse immediately with plenty of water. Remove any contact lenses and open eyelids wide apart. Continue to rinse for at least 10 minutes.
Protection of first aiders	First aid personnel should wear appropriate protective equipment during any rescue.

Most important symptoms and effects, both acute and delayed

General information	See Section 11 for additional information on health hazards. The severity of the symptoms described will vary dependent on the concentration and the length of exposure.
Inhalation	Mildly irritating to respiratory system. In cases of severe exposure, dizziness, confusion, headache or stupor may develop.
Ingestion	Gastrointestinal symptoms, including upset stomach. Fumes from the stomach contents may be inhaled, resulting in the same symptoms as inhalation.
Skin contact	Can cause damage to the eyes, skin and mucous membranes. Prolonged contact may cause dryness of the skin.
Eye contact	May cause temporary eye irritation.

Indication of any immediate medical attention and special treatment needed

Notes for the doctor	Treat symptomatically.
Specific treatments	No special treatment required.

SECTION 5: Fire Fighting Measures

Extinguishing media

Suitable extinguishing media	In case of fire: use foam, carbon dioxide or dry agent to extinguish.
-------------------------------------	---

Juice Endurance Sealant

Unsuitable extinguishing media Do not use water jet as an extinguisher, as this will spread the fire.

Special hazards arising from the substance or mixture

Specific hazards Containers can burst violently or explode when heated, due to excessive pressure build-up.

Hazardous combustion products Thermal decomposition or combustion products may include harmful gases or vapours.

Advice for firefighters

Protective actions Avoid breathing fire gases or vapours. Evacuate area. Cool containers exposed to heat with water spray and remove them from the fire area if it can be done without risk. Cool containers exposed to flames with water until well after the fire is out. If a leak or spill has not ignited, use water spray to disperse vapours and protect men stopping the leak. Control run-off water by containing and keeping it out of sewers and watercourses. If risk of water pollution occurs, notify appropriate authorities.

Special protective equipment Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective clothing. Firefighter's clothing conforming to Australia/New Zealand Standards AS/NZS 4967 (for clothing) AS/NZS 1801 (for helmets), AS/NZS 4821 (for protective boots), AS/NZS 1801 (for protective gloves) will provide a basic level of protection for chemical incidents.

Hazchem Not applicable.

SECTION 6: Accidental Release Measures

Precautions, protective equipment and emergency procedures

Personal precautions No action shall be taken without appropriate training or involving any personal risk. Keep unnecessary and unprotected personnel away from the spillage. Wear protective clothing as described in Section 8 of this safety data sheet. Follow precautions for safe handling described in this safety data sheet. Wash thoroughly after dealing with a spillage.

Environmental precautions Avoid discharge to the aquatic environment. Large Spillages: Inform the relevant authorities if environmental pollution occurs (sewers, waterways, soil or air).

Methods and material for containment and cleaning up

Methods for cleaning up Wear protective clothing as described in Section 8 of this safety data sheet. Clear up spills immediately and dispose of waste safely. Absorb the spillage with an inert, dry material and place it in a suitable waste disposal container. Clean contaminated objects and areas thoroughly, observing environmental regulations. The contaminated absorbent may pose the same hazard as the spilled material. Flush contaminated area with plenty of water. Wash thoroughly after dealing with a spillage. Dispose of waste to licensed waste disposal site in accordance with the requirements of the local Waste Disposal Authority.

Reference to other sections

Reference to other sections For personal protection, see Section 8.

Juice Endurance Sealant

SECTION 7: Handling and Storage

Precautions for safe handling

Usage precautions

Read and follow manufacturer's recommendations. Wear protective clothing as described in Section 8 of this safety data sheet. Ensure adequate ventilation. Keep away from food, drink and animal feed stuffs. Handle all packages and containers carefully to minimise spills. Keep container tightly sealed when not in use.

Occupation hygiene

Wash promptly if skin becomes contaminated. Take off contaminated clothing and wash before reuse. Do not eat, drink or smoke when using this product. Wash at the end of each work shift and before eating, smoking and using the toilet. Change work clothing daily before leaving workplace.

Conditions for safe storage, including any incompatibilities

Storage precautions

Keep in a cool, dry, well-ventilated place. Keep away from frost. Store in accordance with local regulations.

Storage class

Chemical storage.

Specific end use(s)

Specific end use

The identified uses for this product are detailed in Section 1.

SECTION 8: Exposure Controls and Personal Protection

Occupational exposure limits

- Distillates (petroleum), hydrotreated light; Kerosine - unspecified WEL TWA (long term): 200 mg/m³ (EU)

Exposure controls

Protective equipment

Engineering controls

Provide adequate ventilation. Good general ventilation should be adequate to control worker exposure to airborne contaminants.

Eye/face protection

Eyewear complying with an approved standard should be worn if a risk assessment indicates eye contact is possible. Personal protective equipment for eye and face protection should comply with Australia/New Zealand Standard AS/NZS 1337. The following protection should be worn: chemical splash goggles.

Hand protection

Chemical-resistant, impervious gloves complying with an approved standard should be worn if a risk assessment indicates skin contact is possible. The most suitable glove should be chosen in consultation with the glove

Juice Endurance Sealant

supplier/manufacture, who can provide information about the breakthrough time of the glove material. To protect hands from chemicals, gloves should comply with Australia/New Zealand Standard AS/NZS 2161. Considering the data specified by the glove manufacturer, check during use that the gloves are retaining their protective properties and change them as soon as any deterioration is detected. Frequent changes are recommended.

Other skin and body protection	Appropriate footwear and additional protective clothing complying with an approved standard should be worn if a risk assessment indicates skin contamination is possible.
Hygiene measures	Provide eyewash station and safety shower. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reuse. Clean equipment and the work area every day. Good personal hygiene procedures should be implemented. Wash at the end of each work shift and before eating, smoking and using the toilet. When using do not eat, drink or smoke.
Respiratory protection	Respiratory protection complying with an approved standard should be worn if a risk assessment indicates inhalation of contaminants is possible. Provide adequate inhalation. Large spillages: if ventilation is inadequate, suitable respiratory protection must be worn.
Environmental exposure control	Not regarded as dangerous for the environment.

SECTION 9: Physical and Chemical Properties

Information on basic physical and chemical properties

Colour	White.
Odour	Characteristic odour.
pH	Not applicable.
Melting point	Not available.
Initial boiling point and range	Not available.
Flash point	Not flammable.
Vapour pressure	Not available.
Vapour density	Not available.
Relative density	~ 1.270 @ (20°C)
Viscosity	16,500 cPs (20°C)
Solubility Value (g/100g H₂O)	Completely soluble in water (20°C)
Partition coefficient	Not available.
Auto-ignition temperature	Not available.
Comments	Information declared as "Not available" or "Not applicable" is not considered to be relevant to the implementation of the proper control measures.

Juice Endurance Sealant

SECTION 10: Stability and Reactivity

Reactivity	This article is considered stable under normal conditions.
Stability	Stable at normal ambient temperatures and when used as recommended.
Possibility of hazardous reactions	No potentially hazardous reactions known.
Conditions to avoid	Keep away from frost.
Materials to avoid	No hazardous reactions known if used for its intended purpose.
Hazardous decomposition	No hazardous decomposition products known.

SECTION 11: Toxicological Information

Information on toxicological effects

Toxicological effects	No information available but must be considered harmful.
General information	No specific health hazards known. The severity of the symptoms described will vary dependent on the concentration and the length of exposure.
Inhalation	Mildly irritating to respiratory system. In cases of severe exposure, dizziness, confusion, headache or stupor may develop.
Ingestion	Gastrointestinal symptoms, including upset stomach. Fumes from the stomach contents may be inhaled, resulting in the same symptoms as inhalation.
Skin Contact	Can cause damage to the skin and mucous membranes. Prolonged contact may cause dryness of the skin.
Eye contact	May cause temporary eye irritation. Can cause damage to the eyes.
Route of entry	Ingestion, inhalation, skin and/or eye contact.
Target organs	No specific target organs known.

SECTION 12: Ecological Information

Ecotoxicity	No information available. Presents little or no hazard to the environment.
Persistence and degradability	Biodegradable.
Bioaccumulative potential	No data available on bioaccumulation.
Partition coefficient	Not available.
Mobility in soil	The product is water soluble and may spread in water systems. The product is non-volatile.
PBT and vPvB assessment	This product does not contain any substances classified as PBT or vPvB.
Other adverse effects	None known.

Juice Endurance Sealant

Toxicity of ingredients

- Distillates (petroleum), hydrotreated light; Kerosine - unspecified
 - IC50 (algae): >100 mg/l (72 hr)
 - EC50 (da phnia): >100 mg/l (48 hr)
 - LC50 (fish): >100 mg/l (96 hr)

SECTION 13: Disposal Considerations

Waste treatment methods

General information

The generation of waste should be minimised or avoided wherever possible. Reuse or recycle products wherever possible. This material and its container must be disposed of in a safe way. Disposal of this product, process solutions, residues and by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any local authority requirements.

Disposal methods

Do not empty into drains. Do not pierce or burn containers, even after use. Do not reuse empty containers without commercial cleaning or reconditioning. Dispose of surplus products and those that cannot be recycled via a licensed waste disposal contractor. Waste packaging should be collected for reuse or recycling.

SECTION 14: Transport Information

General

The product is not covered by international regulations on the transport of dangerous goods (IMDG, IATA, ADR/RID, ADG).

UN number

Not applicable.

UN proper shipping name

Not applicable.

Transport hazard class(es)

No transport warning sign required.

Packing group

Not applicable.

Hazchem

Not applicable.

Environmentally hazardous substance/marine pollutant

No

Special precautions for user

Not applicable.

Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code

Not applicable.

Juice Endurance Sealant

SECTION 15: Regulatory Information

Safety, health and environmental regulations/legislation specific for the substance or mixture

Schedule (SUSMP) No Poison Schedule number allocated.

Inventories

Australia - AIC

All the ingredients are listed or exempt.

SECTION 16: Any Other Relevant Information

General information	Only trained personnel should use this material.
Training advice	Read and follow manufacturer's recommendations. Only trained personnel should use this material.
Revision comments	NOTE: Lines within the margin indicate significant changes from the previous revision.
